

Proclear® multifocal

CooperVision®
Live Brightly.®

Helps provide all-day comfort for multifocal contact lens wearers who experience eye dryness.

As your vision evolves, you may find that you experience eye dryness and irritation during lens wear. CooperVision® Proclear® multifocal contact lenses may help. They're made with PC Technology™, specially created for contact lens wearers like you; it attracts water to the lenses, helping them remain fresh and comfortable all day long. Focus on life and not on your contact lenses with Proclear.

The features you'll love

- Balanced Progressive® Technology provides multiple correction zones in each lens that are tailored to your personal prescription, so you can see clearly at all distances.
- PC Technology attracts water to each Proclear contact lens, creating a shield of water around it. This helps your lenses stay hydrated, so they feel moist and comfortable throughout the day.
- The Proclear lens material helps you avoid eye irritation by resisting deposit build-up over the course of your day.
