

Serenity™ toric

CooperVision®
Live Brightly.®

High performance. Outstanding value.

If you wear contact lenses for astigmatism and want the most for your money, choose CooperVision® Serenity™ toric contact lenses for excellent performance at a surprisingly affordable price. They're made from an advanced silicone hydrogel material specially developed for long-lasting comfort, easy handling* and a healthy lens-wearing experience. Brought to you by CooperVision, a world leader in toric contact lenses, Serenity™ toric contact lenses have the same trusted optical design features as our premium Biofinity® toric contact lenses to help provide you with crisp, clear vision. They're a smart choice for savvy contact lens wearers like you.

The features you'll love

- Optimized Toric Lens Geometry™ incorporates special design features to provide excellent orientation¹ and stable fit for consistently clear vision.
- Advanced material naturally attracts water molecules, keeping the entire surface of your lenses continuously moist throughout your day.
- High breathability allows your eyes to get 100% of the oxygen they need[‡], which helps keep them white² and healthy[§]
- The highest class UV blocker available in a contact lens helps protect your eyes from the transmission of 90% UVA and 99% UVB.^{||}

* Based on subjective ratings at insertion and after 1 month. Results of a prospective, double-masked, randomised, bilateral, crossover study comparing Serenity™ sphere contact lenses with a competitive reusable sphere lens.

† Spherical aberration.

‡ During daily wear.

§ With higher oxygen permeability than hydrogel materials, silicone hydrogel contact lenses minimise or eliminate hypoxia-related signs and symptoms during lens wear.

|| Warning: UV-absorbing contact lenses are not substitutes for protective UV-absorbing eyewear, such as UV-absorbing goggles or sunglasses, because they do not completely cover the eye and surrounding area. Patients should continue to use UV-absorbing eyewear as directed.
